SUMMARY

Financial Analyst with experience in FP&A, budgeting and forecasting, variance analysis, and financial reporting across construction and corporate finance environments. Builds Power BI dashboards and advanced Excel models that deliver real-time KPI visibility to executive leadership. Bilingual in English and Spanish.

EDUCATION

University of the Cumberland May 2026

Master of Business Administration, Business Administration (GPA 4.0)

Brigham Young University – Idaho April 2023

Bachelor of Science, Finance

- Business Management Certificate
- Business and Leadership Skills Certificate

EXPERIENCE

Financial Analyst January 2024 - May 2026

Novva Data Centers, West Jordan, UT

- Owned monthly financial reporting and forecasting for \$366M+ in multiyear construction projects, delivering lender-grade variance analysis that increased budget accuracy and executive transparency.
- Managed master budgets totaling \$382M across power distribution (\$326M) and substation (\$56M) scopes, tracking commitments, actuals, and remaining funds to maintain real-time financial visibility.
- Reconciled pay applications and lien waivers across 55+ vendor accounts, resolving conditional vs. unconditional discrepancies and ensuring compliant, on-schedule draw submissions while maintaining data integrity across all records.

Financial Support Analyst October 2023 - January 2024

Morgan Stanley, West Jordan, UT

- Reviewed and approved high-volume Travel and Entertainment expense reports under firm-wide compliance policy, maintaining a zero-infraction record across hundreds of weekly submissions and ensuring data integrity across OPEX records.
- Identified and resolved complex OPEX discrepancies through root-cause analysis, strengthening internal controls and improving processing cycle times across the finance operations function.
- Built IRR, NPV, and sensitivity analysis models supporting M&A evaluation, providing senior leadership with structured financial analysis for potential acquisition decisions.

Accounting Assistant Intern May 2023 - October 2023

The Church of Jesus Christ of Latter-day Saints, Salt Lake City, UT

- Reconciled \$1B+ in assets across 500+ accounts monthly, improving financial accuracy, audit readiness, and data integrity for a global organization.
- Automated reconciliation workflows using advanced Excel formulas including pivot tables and lookups, cutting manual processing hours by 20% and freeing capacity for higher-value analysis.
- Prepared financial reports and variance analyses for departmental leadership, supporting budgeting decisions and identifying operational trends to improve cost efficiency.

PROJECTS

Bank Loan Portfolio Dashboard

Analytics dashboard for loan portfolio management and executive decision support.

- Identified high-risk borrower segments through advanced segmentation and KPI analytics, reducing potential loan defaults by 8% and improving portfolio decision support.
- Increased portfolio profitability by 5% by isolating high-performing loan groups based on repayment behaviors and demographic correlations.
- Built an executive decision-support dashboard tracking \$529M funded, \$245M repaid, 12% interest rate, and 17% DTI, delivering real-time financial visibility that accelerated leadership decisions.

Construction Finance Dashboard

Financial dashboard for construction project reporting and lender/executive visibility.

- Cut monthly reporting time from 10 hours to 4 hours by automating data processes in Excel and Power BI, eliminating redundant workflows and improving reporting consistency.
- Improved reporting accuracy by 15% after unifying previously inconsistent data sources into a single validated model.
- Delivered real-time financial dashboards to lenders and executives, reducing inquiry resolution time by 20% and improving KPI accessibility for decision-makers.

Financial Performance Dashboard

Interactive dashboards evaluating revenue, margins, and division performance.

- Built interactive dashboards evaluating revenue, margins, and division performance, improving operational visibility for decision-makers.
- Performed year-over-year variance analysis across revenue and margin lines, identifying growth trends and flagging underperforming categories for leadership review.
- Consolidated disparate reports into a unified tool, reducing manual Excel reporting time and increasing data integrity.
